

Maximize productivity with NEW RAMROD Bale Spears

Yorkton, SK – Feb. 16, 2022 – Work doesn't slow down in the cattle business. Through every season, the list of chores is seemingly endless. That's why RAMROD is here to make things easier. The RAMROD Bale Spear is designed to help you move round bales throughout the farm, from across the yard and through the barn.

The long main tine secures all standard-size round bales. The three tine design adds stability to ensure that bale isn't making any unexpected movement while moving it from place to place. Heavy-duty construction means you're going to be moving bales season after season without having to worry. A low profile design gives added visibility in order to quickly and efficiently guide this spear where you need it to go.

The bale spear adds to the versatility of the RAMROD line of mini skid-loaders, which are essential for a cattle operation. Able to travel through the tightest spots - including barns - RAMROD allows more options to get what you need where you need it. Calving season especially means you're going to have to quickly move feed and bedding, and with a RAMROD Bale Spear you're going to be able to do that quicker than ever.

RAMROD is an important partner in any cattle operation, and it's accessories like the RAMROD Bale Spear that show why. Moving round bales to every corner of the barn is easier than it ever has been before.

Bale Spears are one of over 70 attachments available from RAMROD.
