

## ***Material handling flexibility with Twin Industrial Grapple***

Yorkton, SK – July 8, 2021 – The first step to getting any job done is having the tools you need. When you need to carry a wide range of large and difficult to handle materials, the **RAMROD Twin Industrial Grapple** is the right tool for the job.

Trees, rocks, fence posts and scrap metal are just some of the things the RAMROD Twin Industrial Grapple is designed to carry. The heavy duty construction and powerful hydraulic cylinders mean that your grapple can handle anything you can throw at it. Added versatility comes from a removable base plate which converts the attachment to a grated bucket, for when you need sand or dirt to sift through the bottom. Grease-able pivot points make it easy to maintain.

The 31" and 42" bucket options mean that you can get a RAMROD Twin Industrial Grapple built for where you need to work and the material you need to move.

The universal quick-attach mounting plate means compatibility with a wide range of mini-skid loaders. The Twin Industrial Grapple is just one of over 70 attachments available from RAMROD.
